

The project focuses on creating better urban environments for the inhabitants of Munich to live their everyday life. The project is created in teamwork with Hadil-Ornella Khuri.

“Wohnen am Harras” focuses on creating better pedestrian connections between two areas of Munich, through nowadays privately used green areas. The project consists in turning these areas into a public park, as well as building a new housing complex, which organically borders the park, the existing topography and the new pedestrian connections. The arrangement of the new buildings creates different types of urban spaces: from public and semi-public to semi-private, destined for the local residents.
